

OBJECTIVE:

To convert an existing boatshed into guest accommodation.

CHALLENGE:

Installation of a bathroom and kitchen without access to traditional plumbing.

SOLUTION:

SANICUBIC 1 GR

SANICUBIC 1 GR HELPS HOME OWNERS TURN A BOATSHED INTO GUEST ACCOMODATION.

The once humble boat shed is seeing a resurgence but not for its initial purpose. What was once a simple and practical storage shed is now receiving a major renovation, creating unique and enviable studio and guest accommodation.

In order to create these unique spaces, complete with a bathroom and kitchenette, renovators need the help of a recent Saniflo product, the Sanicubic 1 GR.

The latest addition to Saniflo's Sanicubic range, the Sanicubic 1 GR meets a growing need in the market – the ability to achieve plumbing in sloping waterfront properties, such as boathouses, and on rural properties where the main drainage is too far away.

"We are seeing a growing trend towards converting boat houses on waterfront properties in situations where people want to have added guest accommodation for friends and family, or to add to the value of their home."

- Gregory Waters, Saniflo Australasia

SANICUBIC 1 GR

The Sanicubic 1 GR features a powerful 2200W motor, high flow rate performance, integrated non-return valves, external hard-wired audio visual alarm, and an IP68 waterproof rating. It can pump waste water 20m vertically or 200m horizontally, or a lesser combination of both.

The Sanicubic 1 GR also incorporates an intelligent pump controller, featuring operating hours, maintenance intervals and fault logging. A clever feature of this controller is the ability to monitor power consumption and adjustable parameters that set the pump's working volumes through the increasing or decreasing of the switching levels. The ability to adjust these parameters to suit the customers' particular application has the ability to not only save power but extend the working life of the pump motor itself. Besides the actual operational parameters, the controller system also saves the controlling process and records any irregularities which can be displayed on the LCD screen.

“We have seen a great deal of interest in our Sanicubic 1 GR as it has the ability to lift very high (up to 20m vertically) compared to our other Sanicubics. This 20m vertical lift capacity makes it ideal for those properties that slope, such as waterfront homes and boatsheds.”

- Mike Alborough, General Manager, Saniflo Australasia

After conversion, the boatsheds feature rooms such as an upstairs bedroom and bathroom, as well as a spacious kitchenette and living space at ground level with deck and enviable waterfront views. Without the help of Saniflo, the wet areas in these boatshed studios would not have been possible.

ABOUT SANIFLO

Saniflo is a brand created and owned by the French owned SFA Group. For over 60 years the SFA Group's goal has been to allow one to easily install toilets, showers, sinks, kitchens, baths and hand basins literally anywhere. From its early beginnings as the inventor of the domestic macerating system, the SFA Group is today amongst the main companies providing pump solutions worldwide. Synonymous with quality and technical expertise, Saniflo's made in France products comply with the strictest quality requirements and consistently meet customer expectations. Saniflo products all have Australian Watermark approval and their pumps are intended to be installed by licensed plumbers.

SANIFLO'S DESIGN SERVICE

Saniflo offers project consultancy and assists architects and hydraulic consultants by reviewing plans, assisting with design layouts and recommending the correct pumps and their ideal location. We even work with the plumber onsite during installation to ensure that everything goes as planned. Saniflo has a wide selection of products for domestic and commercial application to provide design flexibility.
